

International CCS+ Summer School 2024

The leading education programme in Europe for digitalization of command, control and signaling

From the 15th until 27th of September there will be another CCS+ Summer School for young international professionals/ newcomers with its focus on **digitalization of the rail industry**. This year a visit to **Brussels, The Netherlands and Germany (incl. a visit to InnoTrans)** is part of the programme with **technical visits, meeting industry organizations** and lectures about **risk management, security, interlocking and ERTMS among others** - all in relation to the challenges inherent to digitalization.

Can we welcome you in September? You are:

- A motivated newcomer with 1 to 4 years experience in digital rail
- Graduated MSc or relevant BSc and having an appropriate level of (business) English (B2)
- Willing to learn more about digitalization of the railway industry
- Interested in building up a network of peer colleagues in Europe
